Alcohol is up to the individual

Suggested quantities above is for a 3-4 day trip on the premise of showering, changing underwear daily, and outerwear as needed.

Early November weather is difficult to plan for!! If you don't take it you won't have it! Early Spring, wind and chilly morning is a big problem, July and August is for serious fishers and needs some extra thought for the heat at night. A word of advice: I have the most enjoyment when I'm prepared for **WIND!**
